- It offers advanced and customizable EMR solutions
- It efficiently optimizes resources, thus improving physician and staff productivity
- It is easy to maintain and upgradable for free
- It can be seamlessly integrated with internal and external software

## Benefits of using SevenHills e-Health Suite

SevenHills e-Health Suite is a completely customizable solution, which offers numerous benefits to hospitals and healthcare providers based on their roles.

### For Clinical Processes:

- Mobile APP for Doctors - Multi-device mobile app is connected with the SevenHills e-Health suite that provides easy access to patient's vitals, progress notes, lab reports, I/O chart, treatment sheet, etc.
- Easy access to medical reports – Prescriptions, vitals, medications, procedure details, and lab reports can be entered into the system by doctors, nurses, and staff members. These details remain in the system for life long, and can be easily accessed by anyone from anywhere.
- SMS alerts to patients and doctors – Patients and doctors receive automated SMS alerts on appointment bookings and confirmations.
- Easy trend analysis of vital parameters – Doctors can view both lab test results and vitals as a trend for any required date range.

## For Operational Processes:

- Web Portal and Kiosk for Patients – This helps the patient to do self registration either from the kiosk installed in the hospital premises or through the web portal at the ease of sitting at home. It also provides other features viz. view and print prescriptions, reports, send feedback, etc...
- Easier and Quicker Registration – The user-friendly system enables even novice computer users to register patients' details easily and quickly without any complications.
- Unique ID number – the UHID cards with unique ID numbers makes tracking patients easy
- Digital Signage & system generated appointment tokens - the system generated appointment tokens makes managing patient visits in a hassle-free manner.

## For Finance and Billing Processes:

- Automated calculation of all payments – Payments can be calculated automatically based on customized rules that doctors and staff members can set depending on the specialty of doctors, patient types, services offered, and so on.
- Easier management of patient billing, insurance, and corporate dues – All information related to insurance, revenue, billing, etc can be efficiently collected and maintained using the e-Health Suite.
- Profitability and growth analysis – System generated analysis and graphical reports of patient data, sales, and related information can be easily acquired and used to forecast growth, set targets, and improve business.
- Easy payment through Mobile e-Wallet – The Mobile e-Wallet enables payments for diagnostics, pharmacy, and other departments get directly deducted from the prepaid mobile wallet. This minimizes the need to carry physical money and makes the billing processes quick and seamless.

## For Admin and HR Processes:

- Easy HR management – Covers basic HR transactions like maintaining records of time and attendance, payroll, duty roaster, taxation, and so on.
- User administration and access rights management – Lets users create, edit, and delete data based on user rights and roles.
